Questionnaire Document

Topic: Group Project Coordinator (SplitUp)

Subject: Design Thinking

Survey link: https://forms.gle/6d21gEv5CxBbtWsQ8

Purpose of the survey

This survey is the Empathize stage of my design thinking project. It aims to understand how college students currently organise group projects and assignments, what frustrates them, and which features would help them most. The findings decide what I design in the prototype.

Target respondents

College students of all years and branches who regularly work on group projects or assignments.

Draft problem statement

College students working on group assignments struggle with uneven workload, unclear task ownership and poor progress visibility, because teams rely on scattered chats with no shared system for splitting and tracking work. This leads to last-minute stress, conflict and unfair grading.

This statement will be finalised after analysing the survey responses.

Questions

Section 1: About you

1. Which year are you in? *(Multiple choice: 1st, 2nd, 3rd, 4th year)*
2. Which branch or course are you in? *(Short answer)*

Section 2: Your group project experience

3. How many group projects or assignments do you do per semester? *(Multiple choice: 1 / 2 to 3 / 4 to 5 / 6 or more)*
4. How does your team usually split the work? *(Multiple choice: the leader decides / people volunteer / random or unclear / one or two people do most of it / other)*
5. Have you ever felt you did more than your fair share? *(Multiple choice: yes often / sometimes / rarely / never)*
6. In your groups, how fair is the workload split usually? *(Scale 1 to 5: very unfair to very fair)*
7. Which tools do you use to coordinate? *(Checkboxes: WhatsApp / Google Docs or Sheets / Trello or Notion / Discord / in person only / nothing in particular / other)*
8. How do you usually find teammates? *(Multiple choice: friends / assigned by the teacher / random classmates / seniors or other contacts / other)*

9. What frustrates you most about group work? *(Checkboxes: some members don't contribute / unclear who does what / missed deadlines / poor communication / unfair marks for everyone / conflicts between members / hard to see progress / other)*
10. Tell me about the last group project that went badly. What happened? *(Paragraph)*

Section 3: Your ideas

11. Would you use a simple tool that splits tasks and shows who did what? *(Multiple choice: yes / maybe / no)*
12. Which features would help you most? *(Checkboxes: task board with assigned work / contribution tracker / deadline reminders / private peer feedback / team chat in the same place / teacher view of progress / other)*
13. What one feature would make group work easier for you? *(Paragraph, optional)*

Why each question is asked

Questions	What I learn
1, 2	Who my users are
3 to 5	How common uneven workload is
6	A measurable fairness score for charts
7, 8	Current tools and how teams form
9, 10	Main pain points, in the students' own words
11, 12, 13	Interest in a solution and which features to prioritise

Survey results summary

To be added after collecting responses: number of respondents, key charts, top frustrations and selected quotes.
